

What is claimed is:

1. An adhesive film for a display, comprising at least three layers of a transparent substrate, an optical functional layer, and an adhesive layer, at least two of said layers being colored, and said colors are achromatic by mixing.
2. An adhesive film for a display, in accordance with claim 1, wherein said optical functional layer is provided on one surface of said transparent substrate, said adhesive layer is provided on the other surface of said transparent substrate, and said optical functional layer has at least one of an anti-reflection function, an anti-static function, and an infrared ray blocking function.
3. An adhesive film for a display, in accordance with claim 1, wherein said optical functional layer and said adhesive layer are provided on one surface of said transparent substrate in this order, and said optical functional layer has an infrared ray blocking function.
4. An adhesive film for a display, in accordance with claim 1, wherein said optical functional layer contains a hard coat material.
5. An adhesive film for a display, in accordance with claim 2, wherein said optical functional layer contains a hard coat material.

6. An adhesive film for a display, in accordance with claim 3, wherein a hard coat layer is provided on the other surface of said transparent substrate.
